The former Republican House Speaker was on Fox and called out Soros, when he was chided for doing so. You may remember the one-trick pony that was Glenn Beck on Fox who spent his entire segment obsessing over George Soros. Soros is a Jew and one you have probably heard about. However, I doubt you’ve heard the names George Birnbaum or Arthur Finkelstein. But if you want to know why Soros is the object of right-wing derision, look no further than these two individuals, both Jews themselves.

I will include a post I did on this a while ago, but the basic gist is this: these two Jews funded right-wing nationalist parties throughout Europe that were opposed to white identity politics and they needed a boogeyman. That boogeyman was Soros, and why? Because Soros has not only funded left-wing groups and figures, but he was also accused of helping the Nazis. So, there you have it, you can oppose the left while calling the left the real Nazis. And doesn’t that just about describe the modern conservative right! The enemy of white people is not Soros, but the modern right.
